

# ClearFlow

## F&D Plastics PFAS-Free Processing Aid

F&D Plastics, introduces ClearFlow polymer processing aids (PPAs) as a PFAS-free solution for blown film, pipe, and wire & cable manufacturing. ClearFlow PPAs offer cost competitiveness and compatibility with other additives while meeting evolving regulatory demands. They provide superior haze performance, precise frost line control, and help reduce die build-up and extruder pressure.

Engineered for global food contact compliance, ClearFlow is suitable for food packaging and potable water pipe systems. ClearFlow is backed by F&D Plastics' regulatory expertise and support services, facilitating a smooth transition away from PFAS-based processing aids. This innovation underscores F&D Plastics' commitment to sustainability and industry leadership in advancing polymer processing technology.
